Red Deer Polytechnic, like many institutions, is moving towards using total hours rather than credits and number of weeks to assign academic credit, billing credit and to schedule appropriately. All approved courses in the 2023 – 2024 Course Guide will be converted to hours by the Office of the Registrar.

**Until June 30th, 2023**

In this section, courses are listed to show what is normally offered at Red Deer Polytechnic. Some courses are not offered every year. Refer to the Timetable to see if specific courses will be offered.

Each course is identified by the name of the subject, following by a course number and a course weight. The instructor/student contact hours are also shown, as well as the number of hours the course normally lasts, the title of the course, and a brief description.

Each course is identified with a course acronym, course number, course title, course credit weight, billing credit, and course title.

**Example:**

ACCT 206-3
(3-1) 15 weeks
Auditing

ACCT name of the subject, often an abbreviation
206 the course number which gives the course a unique identity
-3 the number which follows the dash is the course credit weight
(BC=4) the number of billing credits
(3-1) the instructor/student contact hours per week; 3 hours of class and 1 hour of lab
15 the number of weeks the class runs
Auditing the name of the class

ALL NEW courses have been assigned a four-digit course number (for example: HRM 1281). The intent is to have ALL courses updated to a four-digit course number in the 2023 – 2024 Course Guide.

**Assignment of Academic Credits, or Credit Weight, to Courses**

Course credits are a measure of learning opportunities based on the number and type of instructional hours or equivalent learning experiences. At Red Deer Polytechnic, academic credits are normally equal to billing credits. For courses in University Transfer Programs, academic credits are normally equal to the credit given at university. This is usually equal to the number of lecture hours.

**Definitions**

Credit – the equivalent of 15 hours of class instruction (example: 1 hour per week for 15 weeks including the final exam period).

Course – a series of learning opportunities within a specific subject area to which a final grade is assigned.

Courses have a variety of learning opportunities, among which are the following:

Class – a series of learning activities aimed at acquiring theory.
(i) activities in class are directed by the instructor OR
(ii) context based learning

**NEW | Work Integrated Learning Opportunities:**

Lab – a series of structured learning activities to facilitate the application of concepts, theories, and principles.

Seminar / Tutorial – a series of structured learning activities aimed at further exploration and application of concepts, theories, and principles.

Clinical – a series of learning activities aimed at applying theory in prescribed clinical experiences.

Practicum – a learning activity aimed at combining theory with practical experience.

Field Work – an educational experience involving work of a practical nature acquired by students in a work situation.

**Effective July 1st, 2023**

Each course is identified with a course acronym, course number, course title, course credit weight, billing credit, and course title.

**Example:**

CHEM 1211-3
(45-15S-45)
General Chemistry I

CHEM course acronym
1211 course number
3 course credit weight
(BC=4) the number of billing credits
(45-15S-45) the instructor/student total contact hours of 45 hours lecture, 15 hours seminar, and 45 hours lab

General Chemistry I the title of the course

**NEW | Instructor / Student Contact Hours**

The numbers in brackets, following the course title and course number, show the total number of contact hours for the instructor and student.

(45-0) 45 hours of lecture contact in the academic term
(45-0-45) 45 hours of lecture and 45 hours of lab contact in the academic term
(45-15S-45) 45 hours of lecture, 15 hours of seminar, and 45 hours of lab contact in the academic term
(45/2) 45 hours of lecture delivered on alternate weeks in the academic term scheduled. Refer to the Timetable for details.
Course Duration
Course duration may vary, see timetable for length of courses. A term usually lasts 15 weeks, including the exam period. Courses lasting 15 weeks are called term courses.

Some courses last two terms, or 30 weeks. This includes two exam periods, one at the end of each term. These courses usually run from September to April. They are called full courses.

Prerequisites and Corequisites
Courses listed as prerequisites must be completed before you start the course in question. For example: BIOL 297 lists Biology 30 or equivalent as prerequisite. This means you must complete Biology 30 or equivalent before you can take BIOL 297. Courses listed as Corequisites must be taken at the same time as the course in question.

Note: You usually have to complete a junior course in the same subject before you can take a senior course. This is true even if it is not listed as a prerequisite. If you wish to register in a 300-level course without having taken at least one 200-level course in the same subject, check with an advisor.

Restricted Courses
Some courses are available only if you are admitted to a certain program.

Reserved Courses
Some courses are available first to students in a certain program. Once most students have registered, these courses are opened to all students.

You can find information on restricted and reserved courses in the Polytechnic Timetable.

First-Year University Transfer English Courses
Red Deer Polytechnic offers university transfer English courses at the 200 level. These are usually prerequisites for 300-level English courses and for more advanced work in English. The overall objective for all 200-level courses is to develop critical reading skills and composition skills at the university level. Class discussions and instruction in composing academic essays will be combined with practice in critical analysis and self-expression.

Second-Year University Transfer English Courses
These courses are open to students who have completed two term-courses or one full-year course in English at the 200 level, or who have the instructor’s permission. These courses may be taken to meet specific program requirements, to serve as elective credits (options) in a program, and to lead to more advanced work in English studies. If you wish to major in English or pursue an Honours English program, consult the appropriate university calendars before choosing 300-level courses.
